

eMission

Business Sustainability + Carbon Reduction Programme

Environmental Accreditation – Enviro-Mark®NZ Outline

The 5-step Enviro-Mark process tackles the implementation of each part of a credible EMS in a chronological fashion. We have incorporated Enviro-Mark®NZ within eMission so that participating businesses get this certification while working to improve their overall environmental performance.

Bronze: Compliance with relevant health, safety and environmental legislation

Silver: Production of an appropriate environmental policy based on the identification of environmental aspects and impacts

Gold: Implementation and monitoring of continuous-improvement targets and objectives.

Platinum: Documentation of operational procedures and systems used to manage environmental aspects and impacts (e.g. work instructions, practices, training and communication, management review)

Diamond: Implementation of an internal management and audit programme to correct and drive continual improvement. [At Diamond level, a business is ready for an ISO14001 audit.]
