

Can you be seen?

Navigation lights must be shown from **sunset to sunrise**, and during conditions of **restricted visibility**.
(bylaws 3.3 to 3.6)

Boats of less than 7 metres length and not capable of more than 7 knots may carry navigation lights or simply display an all-round white light.

Powerboats, underway, less than 12 metres in length may combine their stern and masthead lights into a single all-round white masthead light. The boat should also have red and green sidelights.

Powerboats greater than 12 metres in length should show a white masthead light, red and green side lights **and** a white stern light.

Sailing boats, underway, (not using power) must show sidelights and a stern light. These may be combined into a tri-colour lantern at the top of the mast on vessels less than 20 metres in length.

Sailing boats under auxiliary motor power should display their sidelights and stern light as well as a masthead light. You should not use a tri-colour lantern when motoring.
